

You analyze which way the wind blows.
We'll handle the rest.

360PRO

Improve planning & maintenance with 3D virtual technology.

Work With The Experts

Virtual Technology Simplified (VTS) is an industry leader in reality capture. We leverage the latest technology and workflows in order to help solve our customer challenges in renewable energy.

High Tech Equipment

All services include ground-based, non-contact measurement, utilizing the latest technology in aerial UAV, camera, Lidar, Thermal and 3D laser scanning.

Experience & Expertise

We understand the unique challenges of renewable energy, including:

- Deploying in remote locations
- Completing complex inspections
- Maintaining extremely tight tolerances

Comprehensive Services

Deliverables are customized and automated to meet renewable industry needs including:

- Impact Analysis
- Tower Plumbness
- Foundation Analysis
- Can-To-Can Offset Measurement
- Volume Analysis (Pre-Construction)
- Ground Conditions Analysis
- Blade Inspection (Thermal)
- Asset Management (Digital Twin)
- Construction Documentation
- Pre-Assembly Verification & Inspection
